Senior Design

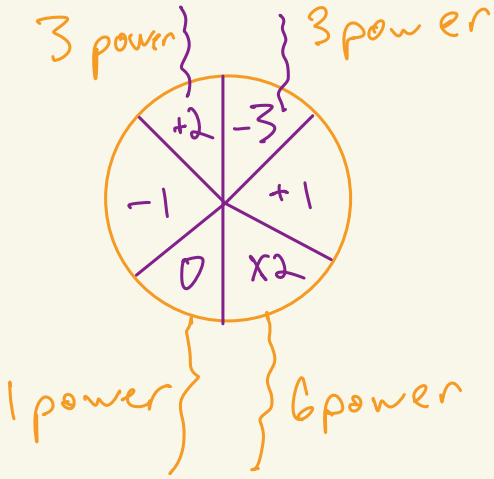

Circuit puzzles

1).-each floor is split into 4 or 6 chunks

- 2 electric beams starting at first floor go all through to the top

- Each section of floor has a different effect that either reduces, adds, or stays the same the power of the beam

- The beams need to be equal at the top

6 power

2) Electrical Resonance Plates

- 3 plates on each floor or just a few

- each plate has a range of tones that change when stepped on

- each floor has a combination to activate the current to unlock something or continue puzzle 1

combo example
1) (1)-2-3-4
2) 1-2-(3)-4
3) 1-(3)-3-4

- clues could be given, or just trial and error

3) Ring matcher

- Symbols or words on an outer ring, middle ring, and outer ring
- can either be seperate on a wall, or on floor and ceiling and need to match
- have zeus Symbols be the ones to match and have other pantheon symbols as the decoys or fillers

- If symbols line up, glow or show player somehow, and open door, compartment to item, or something else

Water Puzzles

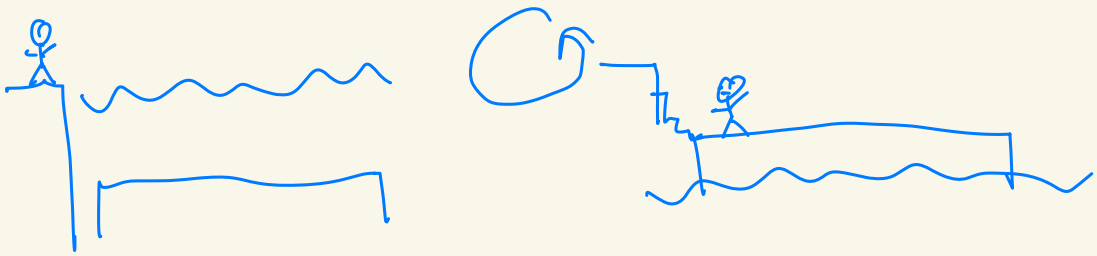

1) Water levels

- Some floors are flooded

- rotating the floor either raises or lowers the water levels

- different levels allow access to either bridges to cross or ledges to reach

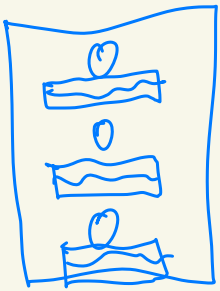

- maybe add boats to keep water rising puzzles simple

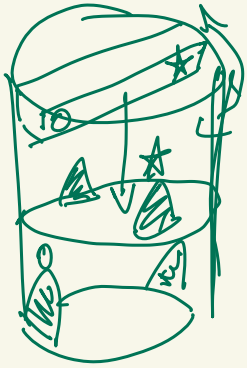

2) Tide Slab

- a slab with glyphs in three layers
- similar to the Zeus ring puzzle
- 3 buckets or troughs that empty into each other from top to bottom
- you can dump the last one if you get it wrong

- the glyph will light up if the right water level is in the corresponding trough

3) Water Basin

- a large basin in the middle of the room

- 4 small basins around main pool that can be tilt into main pool to raise water levels

- 4 small basins can either trickle small, medium, large

- three discs in main basin have different floating rates (ex: Disc 1 = 15+ Disc 2 = 24+ and disc 3 = 30-31)

- Player tips small basins into pool to get the right water level

- If player tips in wrong order to much water overflows basin and draining mechanism drains middle pool

- Discs can be items or plates to step on to open something or any other use

Hades Puzzles

1) Torch Room

- Room of just torches and pillars or other objects

- Player can place torches on certain wall mounts

- rotate room to have the shadows from the torches on the objects create a pattern

in the middle of the floor

2) Elysian Field

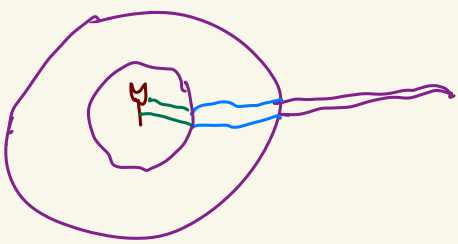

- floating soul flowers that requires a certain color of light to bloom

- a beam of light enters the room

- crystals are on outer wall that can cover light and change the color

- a middle circle has similar crystals that can change color again and can rotate

- Once all flowers bloom something can happen

3) Ghost Choir

- Grey ghosts that float around

- One ghost at a time hums a certain tone

- player rotates room to create the same tone

- Ghost lights up when tone matches and next ghost sings harmonizing tone

- player does that till all ghosts glow and harmonize a certain chord or chords

Combo Puzzles

1) Hephaestus' forge

- 3 steps, heating wings, cooling wings, enchanting wings

- Blue Hades flame has three levels to heat wings. To little doesn't melt metal, To hot over melts a ruins blade

- Route water through pathways to quench the wings

- Avoid impure water ways to keep water pure

- cooling paths as well and water cant be too cold or too warm to properly quench

- Zeus step connects circuit in differing voltage levels

- Must get the right amount of power to properly imbue

- could be end puzzle to fly of with wings

2) Temporal Bridge

- 3 statues of Zeus, Poseidon, and Hades stand in front of a broken bridge over a chasm

- Each statue has a corresponding puzzle to power them

- When all three are powered a spectral bridge will appear leading to an exit or other side
